

HomeWorks® Overview

A HomeWorks system consists of many components that work in unison to provide total home lighting control that is customized for your home and your lifestyle.

Nature has its own way of regulating the light in a subtle, ever-changing play of brilliance and shade that helps to define our day, our tasks, and the way we feel. Lutron has designed HomeWorks to bring all the light that surrounds you conveniently under your control, to make your life more productive, more relaxed, more secure, more efficient, more dramatic – simply more fulfilling.

For further information, see the "Day in the Life" brochure, PIN 367-584

Lutron's full line of natural light control products includes Sivoia QED™ shades and draperies. To learn about integrating these products with our lighting controls, see pg.180.

For more information on how a HomeWorks® system can be customized to fit your lifestyle, please visit www.lutron.com.

8 series

The 8 series is the premier HomeWorks system featuring the widest selection of controls, styles and finishes. The 8 series is designed for new construction or major renovations.

For further information, see the "8 Series Overview" brochure, PIN 367-610

4 series

The 4 series is the most economical HomeWorks system, and features products that use designer opening wallplates. The 4 series is designed for new construction or major renovations.

For further information, see the "4 Series Overview" brochure, PIN 367-608

wireless series

The wireless series delivers all the features of HomeWorks in designer opening wallplates, but does not require any special or additional wiring to install. This makes the wireless series ideal for any existing home, or expansion of an existing system.

For further information, see the "Wireless Series Overview" brochure, PIN 367-606
